

Animal Bites

If you were to get bitten by an animal, what animal, type of species, and when during the year is the most likely scenario to get bitten?

Species Bites

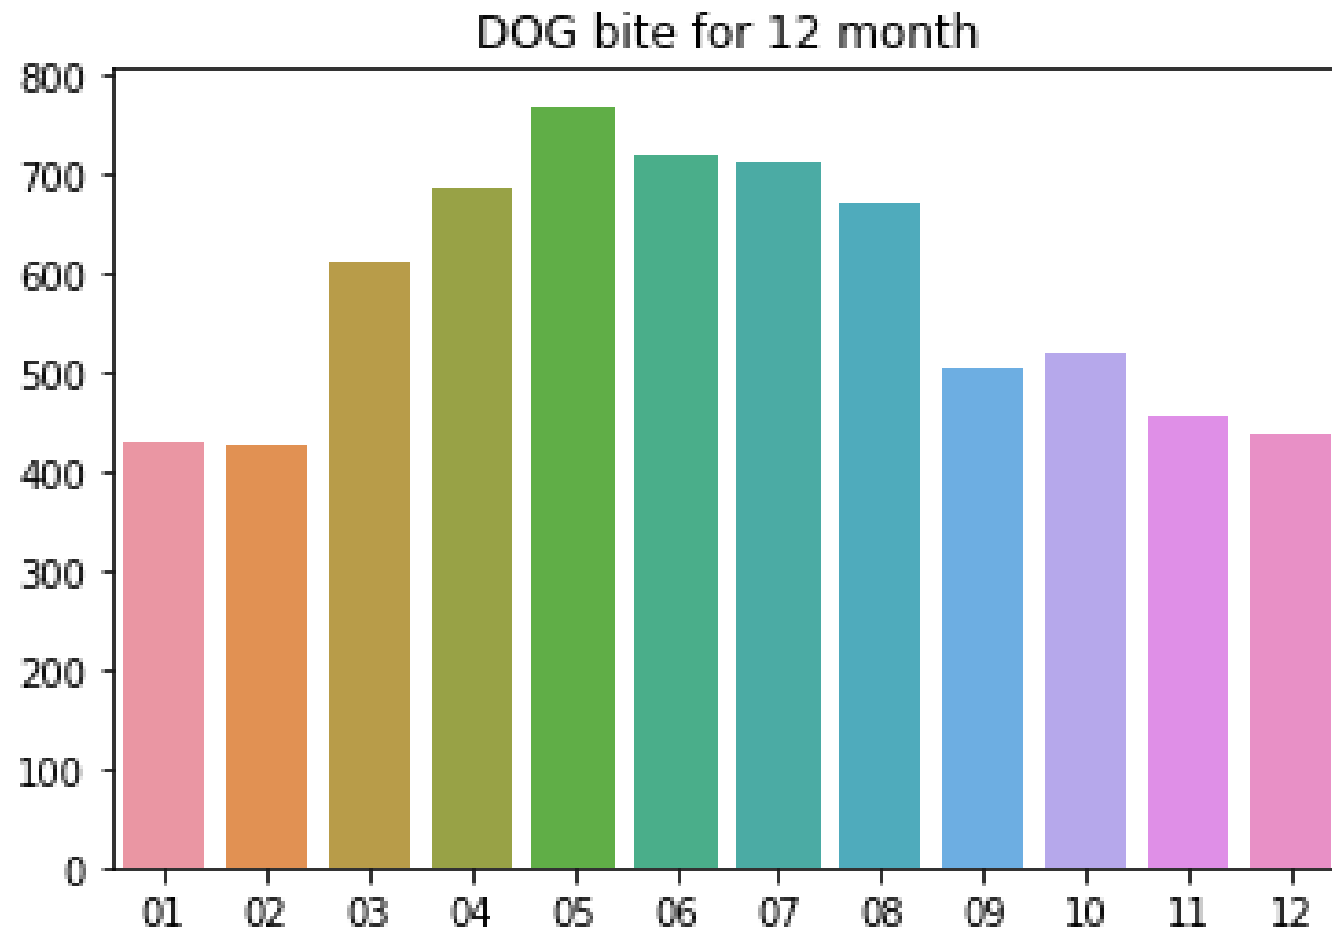

Out of all the animals collected from the data the highest chance bitten animal would be a Dog, with about 7000 cases.

The second and third are Cat and Bat with 1500 and 200, respectively.

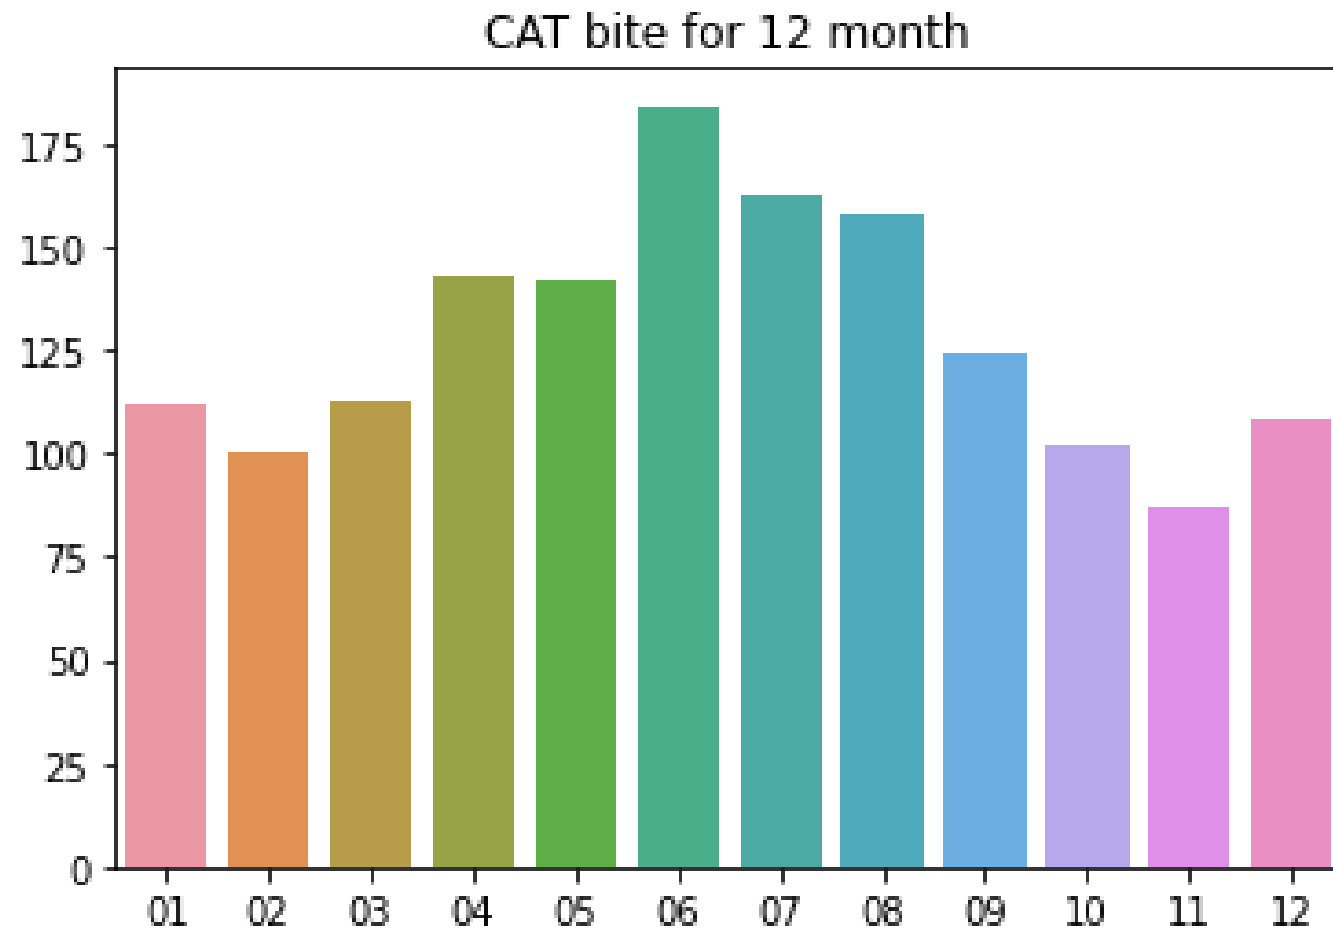

Which month in the year is which
animal most likely going to bite
in?

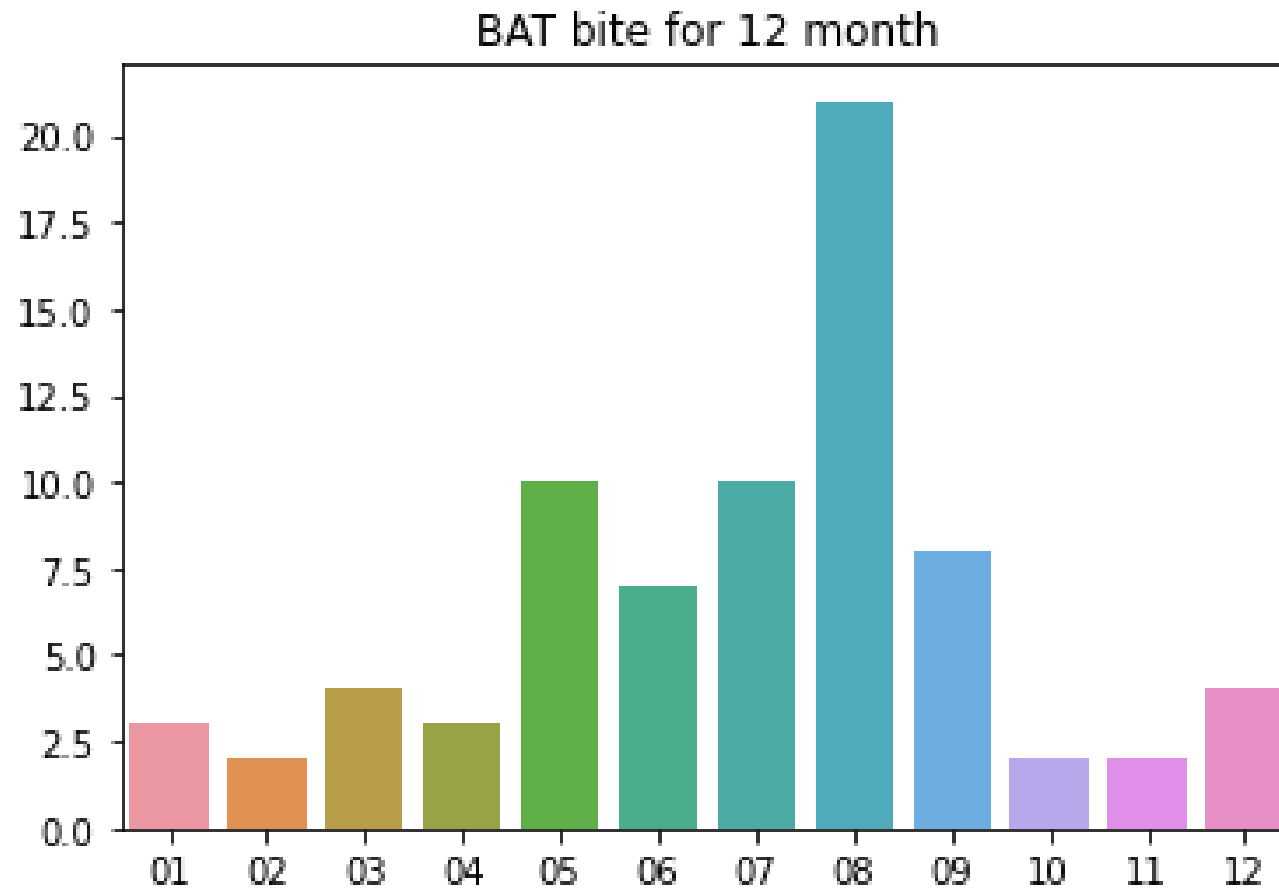

Dogs

Cats

Bats

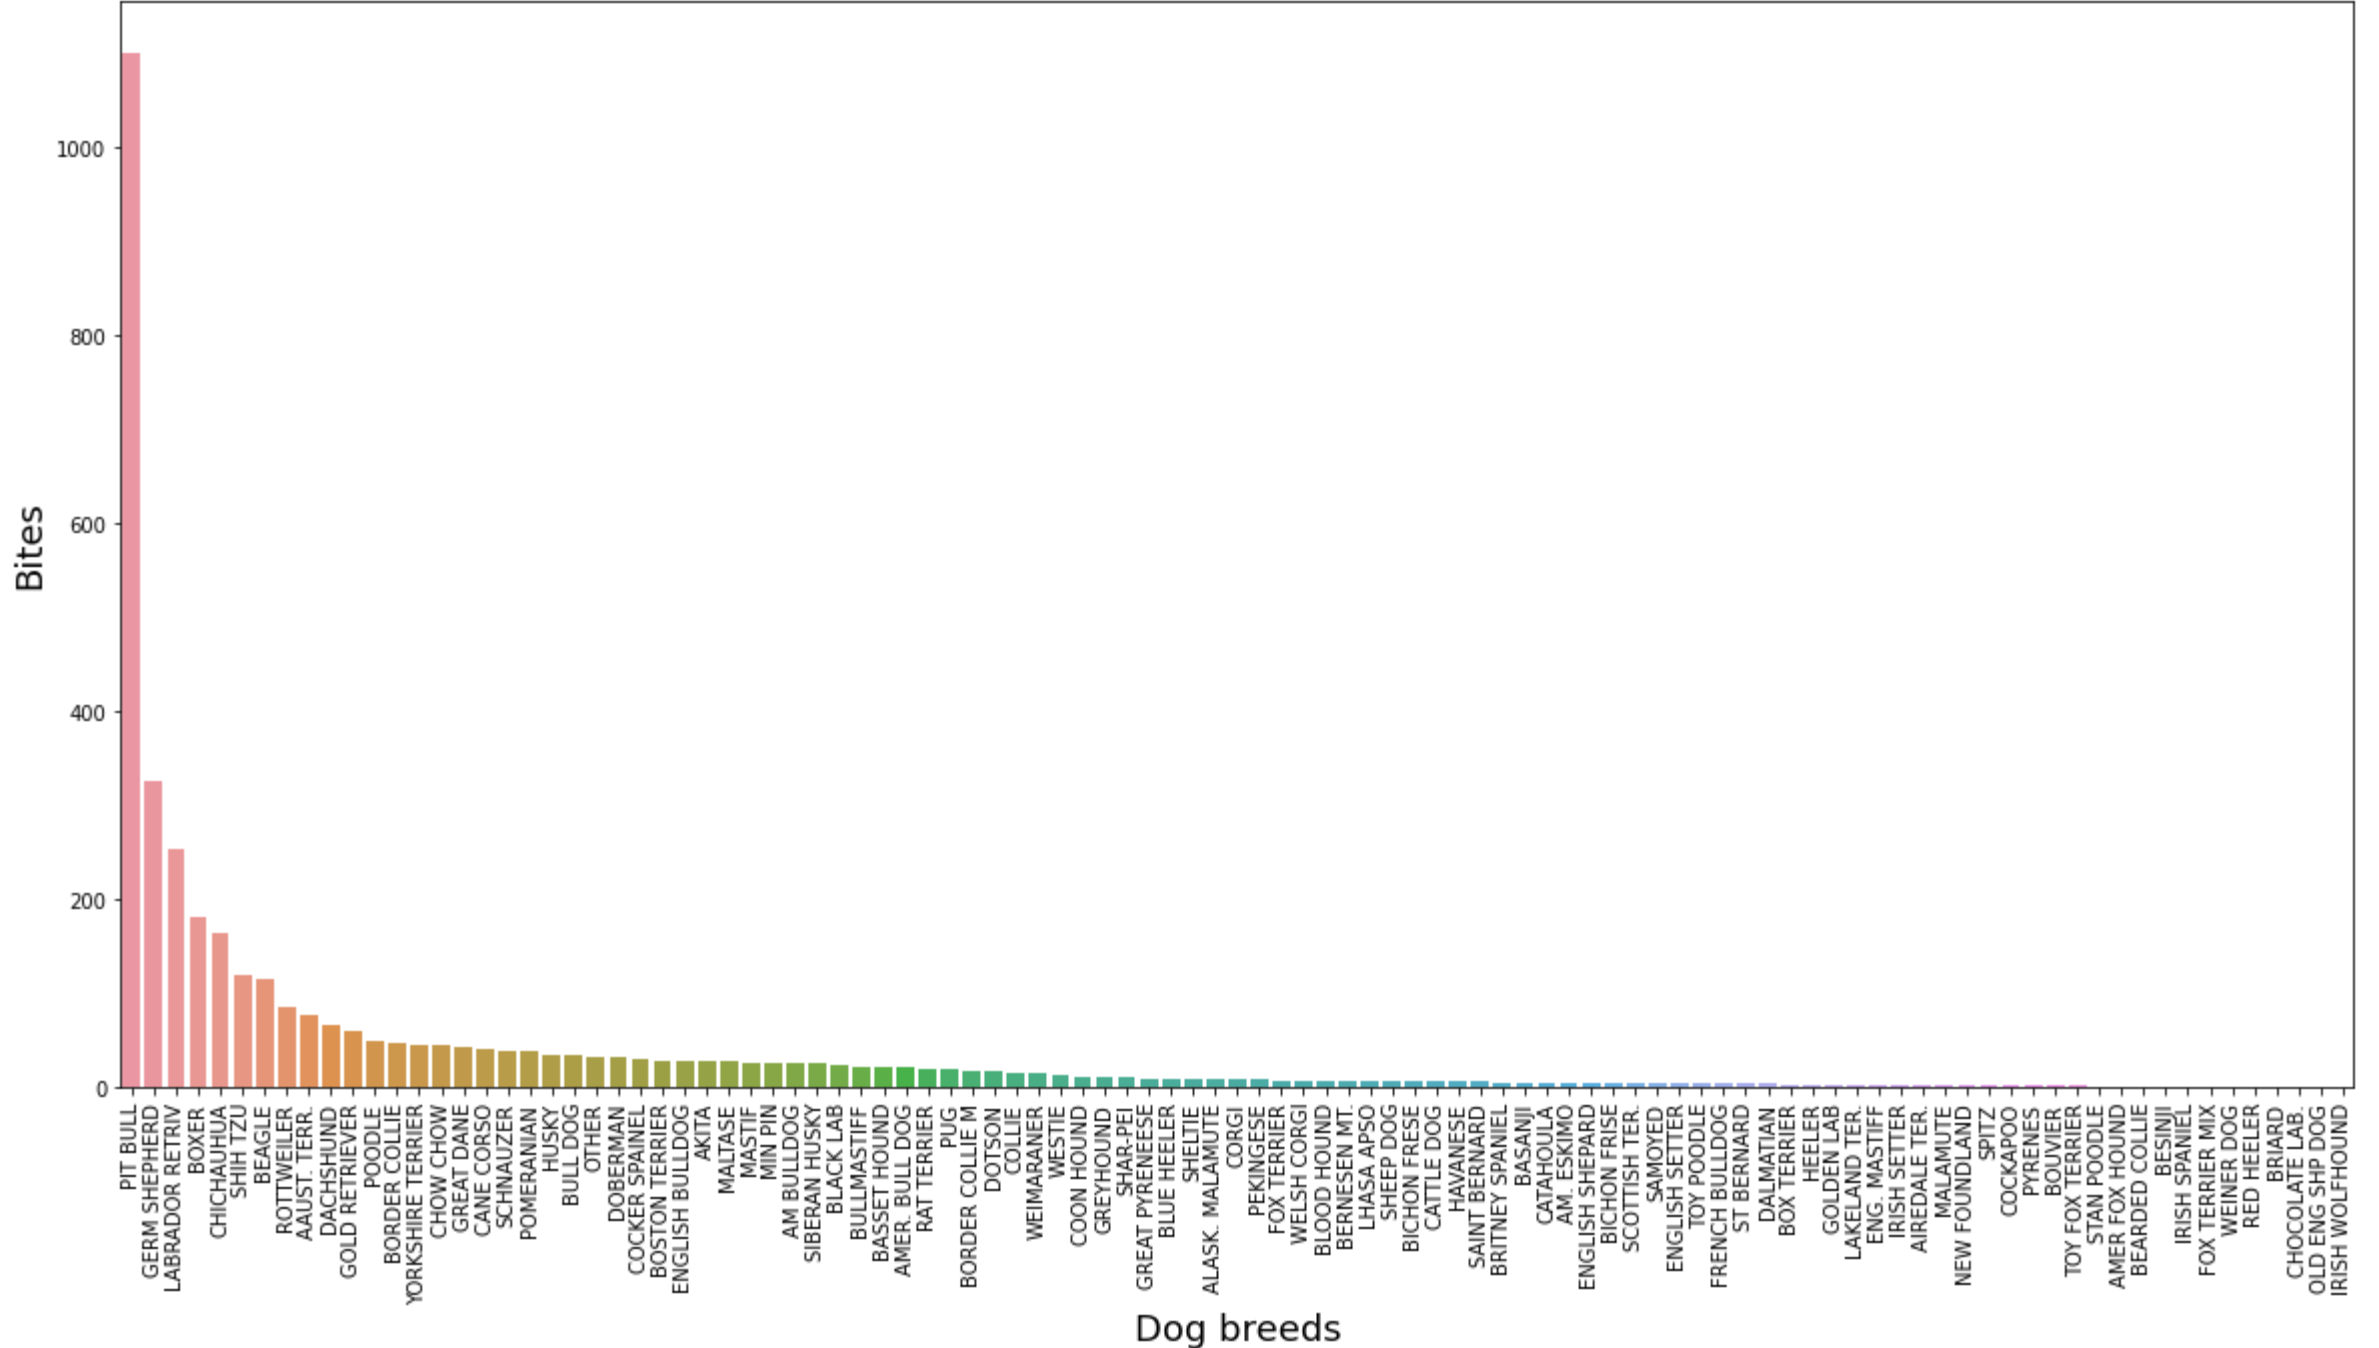

Seems like the summer month (5-8) is the most likely scenario

This is most likely due to people are out more with their animals walking and have more free time than the other months.

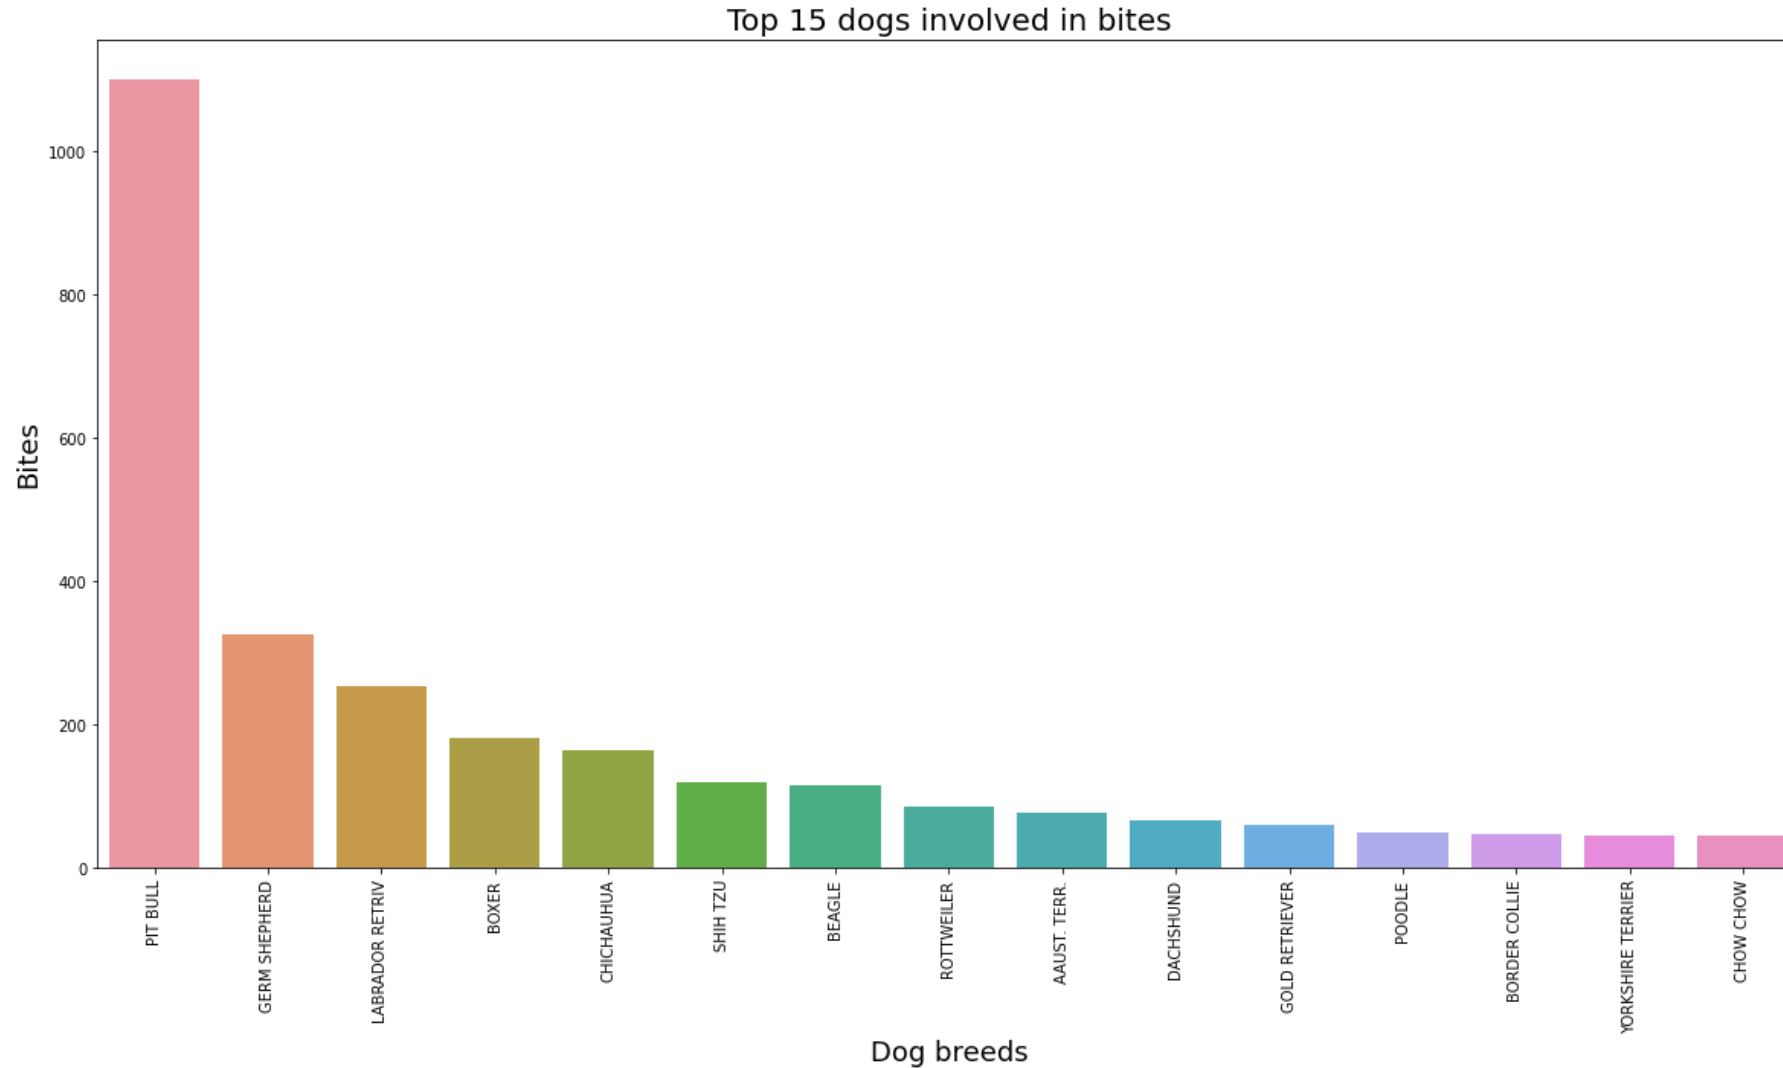

Dogs seem like the most likely scenario, however which species of dog bits the most?

Dog breeds involved in bites

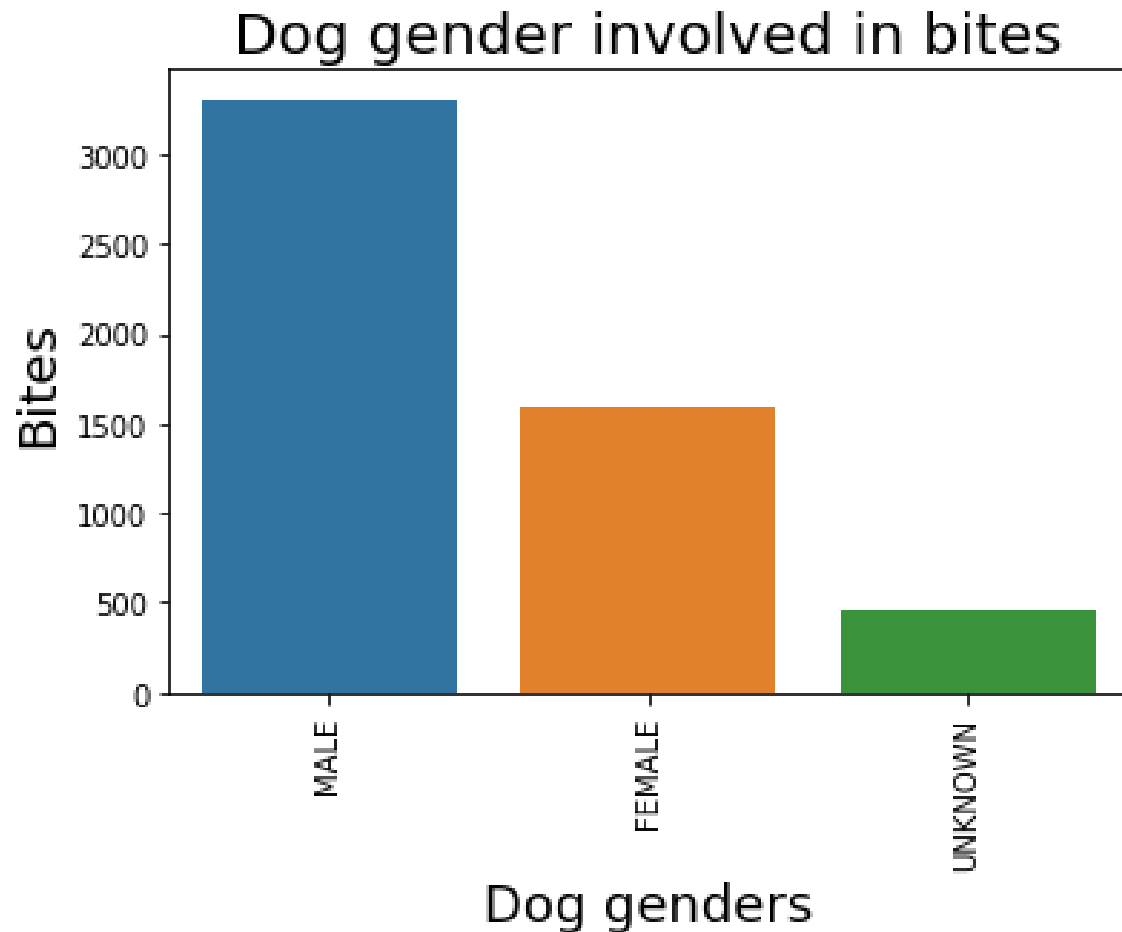

Filtering the graph to
take the top 15 most dog
species

We see that Pit Bulls have the
highest chance of biting than the
rest

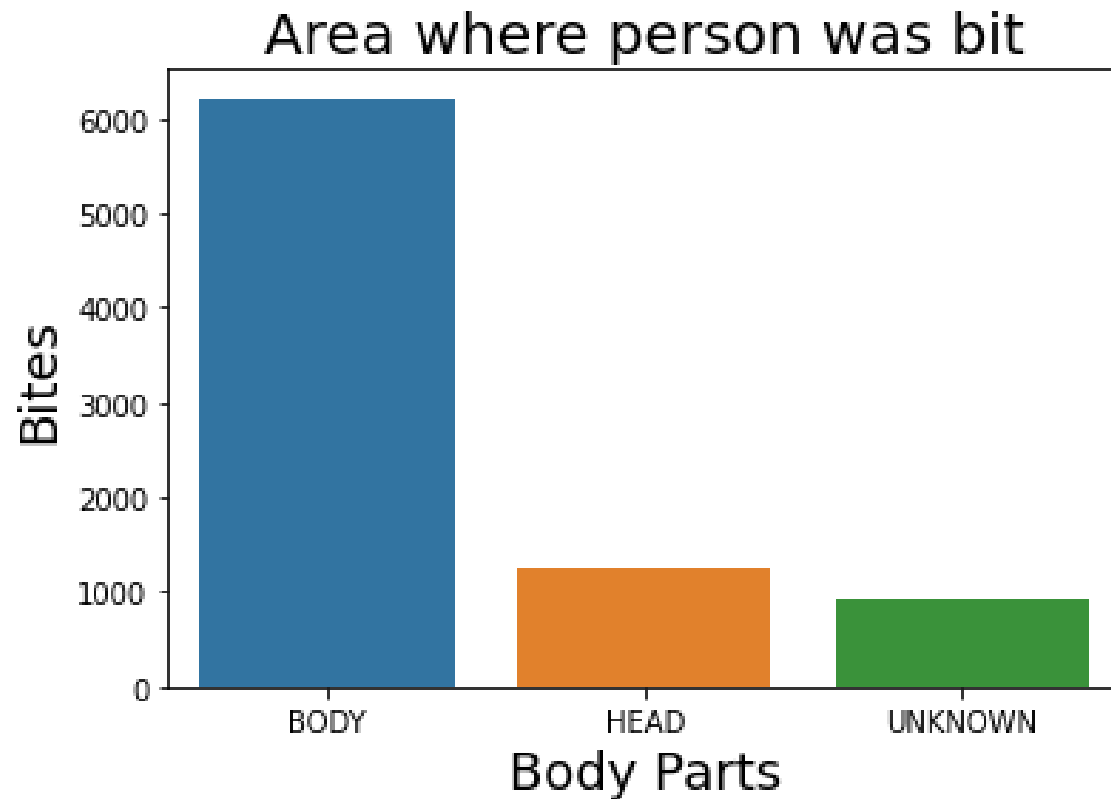

Male or Female more common?

Male dogs have a higher chance of biting by almost twice the chance of a female

More likely to be bit
on the body or the
head?

Body is significantly a higher chance of
getting attacked

If one had to guess what kind of
attacked, the highest chance would
be a Male Pitbull dog attacking the
body in the summer
